

Technical Information

Predator Raptor is one of the most advanced lithium Motorcycle & Powersport batteries on the planet. The Raptor series feature an integrated BMS which actively protects the battery if the voltage, current or temperature move outside the normal operating limits. In intelligent mode, the battery will hibernate when the saved criteria are met (set using Bluetooth App), or if the battery reaches its discharge limit, reserving enough power to start your vehicle.

The Predator Raptor series feature newly developed *Shake to Wake* technology, which enables the user to remotely wake up a hibernating battery using movement. The HyperFlex Fitment System uses quad terminals and EVA spacers to enable each battery to replace a range of sizes.
